Projects

- **Portfolio (React.js)**
Front-end project which demonstrates a collection of personal information, activities, and Projects. Created using React and Tailwind CSS.
- **Blog Website (MERN Stack)**
Mern stack blog platform with features like user authentication, dynamic post creation, and comment management. Designed a responsive interface using React and Tailwind CSS, with MongoDB for storing posts and user data.
- **Survey Website (MERN Stack)**
Reward base survey platform with survey creation, Survey attempt, Admin Panel and real-time response tracking. Integrated Braintree payment gateway for purchasing survey responses and implemented role-based access for companies and clients. Designed a responsive interface with React and Tailwind CSS, and used MongoDB for efficient data storage.
- **E-Commerce Website (MERN Stack)**
Developed a full-stack e-commerce platform with user authentication, product listings, shopping cart, and secure payment integration. Designed a responsive UI using React and Tailwind CSS, with efficient backend APIs and MongoDB for data management.
- **Restaurant Website (HTML, CSS, JavaScript)**
Front-end project for a restaurant with a visually appealing and user-friendly interface. Created using HTML, CSS, and JavaScript.
